

Your Manufacturing Training Solution

Promoting Uptime through Knowledge and Team Building

Learn from Anywhere

Flexible Learning

Maintenance Mastery

Close the training gap

When it comes to training your team, consistency, simplicity and flexibility are paramount, which is why you need a training solution that provides skills you can measure and track.

Our mission is to mitigate chaos on the production floor by minimizing 'the training gap' for manufacturers.

The more skilled and proficient your team, the smoother things run.

Skill driven training

We specialize in managing all your training needs. From compliance training to cross training employees, we make tracking effortless with built-in alerts and notifications.

- Required Compliance Training
- Specific Skills Training
- OSHA Training
- Skills Matrix Training
- Management Oversight
- Successful Learning Feedback
- New Hire Training
- Advanced Topical Training

Flexible Learning

Not everyone learns at the same pace.

Our online training allows users to fast track through modules, or rewind mid-lesson to clarify concepts.

We've broken down complex technical information into quick modules, each followed by a short exam.

To receive a valid certification, users are required to pass all module exams and must also demonstrate proficiency in our Practicum Sandbox.

Effective Solutions

Our Training Programs are the result of more than 20 years of coaching and training maintenance teams.

From the beginning, we knew that our online training program would require two things: automated progress tracking for management, and a training system that definitively indicates the proficiency of the user. We utilize module exams to test knowledge and a hands-on practicum to reinforce training concepts.
